COURSE DESCRIPTION:

The strategies in this book are divided into seven categories, including work for whole class groups, pairs, and individuals, as well as reluctant learners. Not only are the 99 possible strategies going to help engage your students, but you will find they will banish any boredom you may be experiencing as well. Based on sound teaching strategies, you use the processes to get students involved with material you already planned to cover. No special equipment or preparation is required, and there is an appendix with helpful forms that can save your preparation time. There is plenty of variety to try with any class, teaching style and grade level. You will have fun selecting the best fit for your classes, and finding out just how to get the student engagement and focus that makes learning indelible and authentic. Eric Jensen, brain researcher, has endorsed it as "the most practical engagement book on the market."

BATTLING BOREDOM

ERWIN, JONATHAN C. 2004. *The Classroom of Choice, Giving Students What They Need and Getting What You Want*, Alexandria, VA. ASCD. 229 pages. ISBN 0-87120-829-6

This book is based on Glasser's beliefs that people have these motivators: fun, freedom, power and belonging. Give students choices, and they will pick the one that meets a basic unmet need. It is a rich and wonderful book, full of practical and engaging teaching strategies to help teachers achieve important intellectual goals in the process of helping students meet their developing social and intellectual needs. Erwin believes that while learning is hard work, it doesn't have to be painful: Fun is both a prerequisite for and a byproduct of quality learning.

FERLAZZO, LARRY. 2011. *Helping Students Motivate Themselves: Practical Answer to Classroom Challenges*. Larchmont, CA. Eye on Education. 190 pages. ISBN 978-1-59667-181-2

Find a dozen categories of strategies to engage the thinking and processing of your course information. In this book by award-winning author Larry Ferlazzo, you will see: How to motivate students, help students to take personal responsibility, deal with disruptive students and classes, find best ways to maximize the chances that a lesson will be successful, and more. Each section of the book provides stimulating ideas and down-to-earth tools, including lesson plans, and even downloads of the handouts that save you hours.

HIMMELE, PERSIDA & HIMMELE, WILLIAM. 2011. *Total Participation Techniques: Making Every Student an Active Learner*. Alexandria, VA. ASCD. 133 pages. ISBN 978-1-4166-1294-0

this book is a highly recommended companion to the text for this course. It begins with a chapter "The High Cost of Disengagement," and makes an enthusiastic case for banishing boring education. The Total Participation Techniques "are teaching techniques that allow for all students to demonstrate, at the same time, active participation and cognitive engagement in the topic being studied." Many strategies are described with clear directions, and ways to assure higher-order thinking. The strategies have been field-tested in elementary to college classes. A real winner; very readable.

MICHALKO, MICHAEL. 2006. *Thinkertoys (2nd Ed)*. Berkeley, CA. Ten Speed Press. 395 pages. ISBN 13-978-1-58008-773-5
This is an exciting collection of prompts for creative thinking and visual thinking. It is addressed to business people, primarily, and it is full of more ideas than you will ever need, but it is a rich resource for fun, engaging, worthwhile creative writing and visual prompts.

SAGOR RICHARD. 2003. *Motivating Students and Teachers in an Era of Standards*. Arlington, VA. ASCD. 152 pages. ISBN 0-87120-801-6

In six-fast-paced chapters, there is a focus on the need for both teachers and students to feel the power of experiencing basic psychological needs: a sense of competence; belonging; usefulness; potency; and optimism. Each chapter focuses on one of these needs, which are drivers for student/teacher motivation to work hard.

WORMELI, RICK. 2005. *Summarization in any Subject; 50 Techniques to Improve Student Learning*. Alexandria, VA. ASCD. 226 pages. ISBN 978-1-4166-0019-0

Here is another tantalizing collection of "classroom-tested techniques for written, spoken, artistic, and kinesthetic summarization techniques for individual use or group activities across the content areas." The directions and illustrations for the fifty strategies are excellent and ready to use.
