COURSE DESCRIPTION:

Literacy Strategies for Grades 4 – 12 by Karen Tankersley is a great resource for teachers who need to help students improve understanding of textbooks and develop thinking skills critical to success in secondary education. There are many encouraging and interesting ideas to make the job of the secondary teacher more successful AND more lively. This is the second book by Karen Tankersley, amplifying on her highly successful original book *Threads of Reading: Strategies for Literacy Development*, in which she explains that the teaching of reading is sequentially based, and continues to develop throughout school years. LITERACY STRATEGIES for GRADES 4-12

ALLINGTON, R. *What Really Matters for Struggling Readers: Designing Research-Based Programs*. New York: Addison-Wesley Longman, 2001. This book includes research on the best practices for building fluency, comprehension skills and interventions that work for struggling readers and writers. It is easy to understand and practical. We know that good readers tend to be good writers, and so this book helps your students have the skills to become strong readers.

ANDERSON, Jeff. *Everyday Editing*. Portland, ME, Stenhouse Publishers, 2007. Move your students beyond the fear of the red pen. You will learn how to use mentor sentences and best practices to tackle "grammarphobia." You will learn to teach writing and editing in a way that students not only understand, but also enjoy. The book is friendly to read and does not make you feel stupid about grammar.

ANDERSON, Jeff. *Mechanically Inclined: Building Grammar, Usage, and Style into Writer's Workshop*. Portland, ME: Stenhouse Publishers, 2005. *Mechanically Inclined* is the culmination of years of experimentation that merges the best of writer's workshop elements with relevant theory about how and why skills should be taught. It connects theory about using grammar in context with practical instructional strategies, explains why kids often don't understand or apply grammar and mechanics correctly, focuses on attending to the "high payoff," or most common errors in student writing, and shows how to carefully construct a workshop environment that can best support grammar and mechanics concepts.

FERLAZZO, Larry and HULL-SYPNIESKI, Katie, *Navigating the Common Core with English Language Learners: Developing Higher-Order Thinking Skills*, J-B Ed: Survival Guides, 2016, 370 pages.
